FORTIFY

ENTERPRISE-GRADE SECURITY FOR BUSINESSES

In today's rapidly evolving threat landscape, basic protection is no longer enough. Fortify/365 offers a comprehensive, tailored security solution for your Microsoft 365 environment, ensuring business continuity and safeguarding critical assets.

Key Benefits

1. 40% average improvement in Microsoft Secure Score.
2. Specifically designed to strengthen the cybersecurity of Microsoft 365 products and services.
3. Automated implementation processes to reduce project costs and time to deploy.
4. Subscribe to ongoing Fortify Updates and backup of your 365 configurations.
5. Helps meet industry standards including GDPR, CJIS, HIPAA, CMMC, CIS18 and PCI DSS.

Proven Security Enhancements

1. Comprehensive coverage from identity to devices to data.
2. Tailored configurations supporting operational workflows.
3. Utilize security automation stop threat activity that is far faster than human response.
4. Continuous improvement to stay ahead of threats.

IDENTITY

- Fortify/365 Baseline Config
- Entra ID + MFA
- Email Security
- Defender for Identity
- Microsoft 365 Backup
- MDR for Identity + 24x7 SOC

DEVICES

- Device Management with Intune
- Defender for Endpoint EDR/XDR
- Automated App Deployment
- MDR for Devices + 24x7 SOC

DATA SECURITY

- Sensitive Information Protection
- Data Loss Prevention
- Teams, SharePoint & OneDrive
- Defender for Cloud Apps
- External sharing & device access controls
- Copilot for Microsoft 365 Readiness

Implementation

1. Review Microsoft 365 licensing to understand your current security capabilities.
2. Compare the Fortify baseline to your existing configurations.
3. Understand the operational impact of recommended changes.
4. Roll out the approved changes using the Fortify proven methodology.

> "Covenant Tech's Fortify solution has been a quiet but powerful protector for our business. It sits in the background, vigilantly safeguarding our systems and data, giving us the peace of mind to focus on caring for our patients. The fact that we haven't had any issues is a testament to how well Fortify works - no news is good news when it comes to cybersecurity."
